

# INDULGE YOUR INTERIORS JetFlex® style.

IF YOU SPECIFY OUR HIGH PERFORMANCE EXTERIOR COATINGS, then you will appreciate that the same superior durability and appearance are available for interior applications.

## AEROSPACE COATINGS: THE INSIDE STORY

JetFlex® is the perfect finish or refinish for plastic, metal and composite interior surfaces. Both tough and beautiful, the wide palette of colors are suitable for application in whatever you fly ... from commercial airliners and business jets to helicopters or single-engine airplanes.

## Available in Two Technologies ...

... JETFLEX® MEETS EVERY INTERIOR COATING NEED.

### Solvent-Based Polyurethane Enamel:

- Qualified to the Boeing Material Specification **BMS 10-83D**, Type II and III, including flammability, yellowing resistance and smoke-stain resistance requirements
- Excellent adhesion to plastic and metal
- Outstanding stain resistance
- High abrasion/scratch resistance
- Quick drying, easy to apply
- Designed to meet the **FAR/JAR 25.853** regulations for burn, smoke and heat release

### Water-Reducible Polyurethane Dispersion:

- Low VOC, ideal where solvent issues are an issue
- Contains no free isocyanates, lead or chrome
- One package, no catalyst, easy to apply
- No flash point or fire hazard
- Similar performance to solvent-based polyurethanes
- Excellent hardness and chemical/solvent resistance
- Designed to meet the **FAR/JAR 25.853** regulations for burn, smoke and heat release
